

# ScentSticks

powered by  
scentair™

DMX is pleased to offer a revolutionary new take on the classic oil reed diffuser. Introducing **ScentSticks™**. These pre-scented sticks deliver a consistent level of scent that outperforms traditional liquid-based reed diffusers and are perfect for scenting small spaces such as elevator landings and guest rooms.

**ScentSticks** can be prominently displayed in a decorative vase or tucked away into existing décor items or plants and their fragrance will be noticed immediately.

**ScentSticks** are completely dry to the touch and do not require messy oils that can spill or damage furniture. They are scented with high-quality fragrances to create a pleasant, memorable experience.
