

ScentStream 2010A

SXD2010A HVAC SCENT DIFFUSION SYSTEM

The ScentAir ScentStream® is ideal for creating ambient scent environments in large business settings. The advanced diffusion technology releases fragrance into existing heating and air conditioning ventilation systems without sprays, aerosols or heated oils. Adjustable duration and intensity settings make it easy to customize the scent output for any environment.

Product Features:

- Virtually silent operation
- Selectable output for 1 or 2 nozzles
- Features patent-pending fragrance optimization system
- Provides coverage for areas with an air volume of up to 31,000cfm (52,000cmh)
- Twenty-four hour clock with variable cycle times
- Simple and clean replacement of scent oil
- Anti-vibration wall mounts included
- Uses long-lasting 5L container
- Thousands of quality scents to choose from
- Optional duct pressure sensor for more efficient use of oil

ScentStream 2010A Technical Specifications

Dimensions	10"W x 6.875"H x 5.5"D
Weight	8.7 lbs
Coverage	Up to 31,000cfm (52000cmh) (Dual nozzles)
Variable Output Control	Up to 4 grams per hour (Dual nozzles)
Variable Cycle Time	10 Second ON/OFF MIN. / 10 Minute ON/OFF MAX. 10 Second Increments
Programmable Day Timer	24 hr Day Timer w/ two event settings
Power Supply	CE & UL Listed 12V DC Power Supply
Power Requirements	100V AC - 240V AC 1.5 AMPS max
